## DETAILED ACTION

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-8 and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by **Benson** (EP 0,936,530).

**Benson** teaches:

An on-line purchase and load, OPAL, server for performing a transaction over a network using a virtual smart card (6), said OPAL server comprising:

a virtual smart card database (VSC server 8; paragraph [0034]) having a plurality of records, each record including a virtual card identifier and a balance corresponding to a single virtual smart card (abstract);

a hardware security module (paragraph [0066-0071]);

a smart card emulator that receives smart card commands and processes said commands in conjunction with said virtual smart card database and said hardware security module (figs.1 & 15);

**Serial Number: 09/359,083**

**3**

**Art Unit: 3628**

a pseudo card reader module that receives said smart card commands and relays said commands to said smart card emulator, whereby said OPAL server performs a transaction over said network using one of said records in said virtual smart card database [0087-0108];

a user verification module that verifies a user accessing said OPAL server and generates a user identifier, said user identifier being suitable to identify one of said virtual smart card records in said card database (figs.8-15);and

wherein said smart card emulator and said pseudo card reader module are implemented as a single software module (claim 1 or 10).

### **Response to Arguments**

3. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection
